SUMMARY

Computer Science student with a growing focus on frontend development. Comfortable across the full stack — from responsive interfaces to Flask-backed systems with real databases — and driven by turning ideas into software people can actually use.

EDUCATION

Bachelor of Science in Computer Science *Expected 2028*

Eastern Samar State University — Oras, Eastern Samar, Philippines

Academic Honors: Dean's Lister (2 semesters)

Relevant Coursework: Computer Applications, Database Management, Information Systems, Technical Communication

TECHNICAL SKILLS

Languages: Python, HTML, CSS, JavaScript

Frameworks: Flask, PyQt5

Databases: MySQL, MariaDB, SQLite

Tools: Git, GitHub, VS Code, Canva, Photoshop

PROJECTS

Habitly *Flask · SQLite · JavaScript · 2026*

Full-stack habit-tracking web app with user accounts, streak tracking, a weekly progress chart, and optional photo logs per entry. Includes dark mode and installable PWA support. Deployed live.

Secure Online Voting System *Flask · MySQL · UI/UX · 2026*

Responsive web application with custom secure database tables, live result dashboards, and multi-device support.

Student Records Engine *Python · PyQt5 · JSON · 2025*

Desktop application with robust, transactional state handling for loading and saving student records.

Explore Bangkok *HTML · CSS · JavaScript*

Responsive travel guide website with seamless UI transitions and layouts optimized across desktop and mobile.

ADDITIONAL EXPERIENCE

Freelance Virtual Assistant — Administrative Specialist *Remote · 2026*

- Managed executive-level calendar workflows and inbox systems using Google Workspace.
- Used AI tools (ChatGPT, Gemini) to automate repetitive tasks and draft correspondence.
- Built presentation decks and digital assets in Canva with consistent brand standards.
